If your school journey is over 7 km, the Social Insurance Institution (KELA) subsides it.

If the distance to your nearest educational institution is over 100 km, you have the right to allowances for accommodation and school journeys.

Planning together a study path that meets your needs. Your personal plan contains information on what and how you study, what kind of guidance and support you need, and how your competence is assessed.

You can change your qualification or study programme if you feel the studies you started do not suit you.

The teaching, guidance and support will help you achieve your goals. Study progress is guided and monitored.

Your compulsory education can be put on hold for a specified or unspecified time if you have a long-term illness, need family leave or have some other reason related to your life situation.

Your personal plan is updated as your studies progress.

If you discontinue your studies without a valid reason, your municipality of residence will be notified.

Your municipality of residence will then look into your situation, and you will receive guidance on how to find a new student place.

If you need advice, you can ask for guidance on how to apply for further studies.

If you need support, you may be referred to a professional in healthcare, social welfare or rehabilitation services.

The aim is for you to complete your qualification in 3 or 4 years. You can advance faster in your studies too.
